

La Salle Academy
Summer 2023 Math/Reading
Incoming 6th Graders

Math

- Complete the Simple Solutions Worksheets given to you by Mr. Dowd (mostly fraction and decimal review)
- Continue working in your Simple Solutions math books
- Practice multiplication/division facts and reducing fractions to simplest form

Reading

- See the instructions below to sign into Readworks for some reading passages and questions. I will have a new passage and question set up each Monday. Each passage is due at the start of the school year so students don't have to complete the assignment before the next one opens.

- Please also continue to read on your own. You can make a log of any books you read over the summer and bring back to school in the fall, as well. I encourage you to make a journal of your thoughts and predictions while reading and/or discuss the book(s) with a friend or family member.

1. Go to www.readworks.org/student
2. Students should sign in with a Google account. Could be a personal account or even a parent email account for this summer work.
3. Students enter class code **UNFCSR**
